

ADARSH RAJARAM HEGDE

Senior System Analyst

Dublin, IE | +353 89 451 6970 | contactadarshr@gmail.com | [linkedin.com/in/contactadarshrajaram](https://www.linkedin.com/in/contactadarshrajaram)

Objective

To leverage my 5 years of experience as a Senior System Analyst and advanced education in Business Analytics and Computer Science in a challenging role where I can drive impactful solutions through strategic system analysis, data-driven decision-making, and cross-functional collaboration. I aim to apply my expertise in requirement gathering, system design, and process optimization to deliver high-quality, scalable solutions that meet organizational goals and enhance operational efficiency. Passionate about bridging technical and business needs, I seek to contribute to a forward-thinking organization where I can support innovation and continuous improvement.

Summary

Results-driven Senior System Analyst with over 5 years of experience in system analysis and software development, complemented by advanced degrees in Business Analytics and Computer Science. Proven expertise in gathering requirements, designing scalable systems, and optimizing business processes to drive efficiency and meet strategic goals. Skilled in leveraging data analytics to inform system improvements and bridge the gap between technical and business teams. Known for creating detailed technical documentation, utilizing Object-Oriented Analysis and Design (OOAD) principles, and developing UML diagrams to communicate complex system designs.

Visa and Location Details

Visa and Sponsorship: Stamp 4, No need of Sponsorship

Location: Hybrid or Remote or relocate to Anywhere in Ireland and Europe

Open to Permanent and Contractor Roles

Work experience

Mastercard Ireland, Dublin, IE

2021-10 - present

Senior Product Manager - Technical (System Analyst)

- Conducted in-depth analysis of customer and market needs to understand the business value and priorities for potential features.
- Collaborated closely with cross functional teams early in the project to understand the value of proposed product enhancements.
- Contributed to defining high-level requirements through targeted research, in-depth analysis, and exploratory activities to clarify and validate business needs.
- Utilized a range of design artifact like screen mock-ups, scenarios, use cases, and user stories to create solutions that are fit for purpose, and provided detailed estimates to support project planning and budgeting.
- Worked closely within a scrum team, alongside the Product Manager, Lead Engineers, Software Engineers, and Testers, following Agile principles.
- Made sure that team fully understands the business, market, and architectural requirements, enabling them to deliver solutions that provide clear business value and meet project delivery goals.
- Supported and mentored other analysts by guiding feature development and providing insights that shape product direction and solution design.
- Proactively identified project risks at an early stage, ensuring timely communication, management, and escalation when required.
- Developed and organized complex data models in a structured, adaptable format to support system requirements and business objectives, using Object-Oriented Analysis and Design (OOAD) principles.
- Utilized Unified Modelling Language (UML) to create detailed system representations, including class diagrams, sequence diagrams, and use case diagrams, ensuring a clear and standardized approach to system design principles.
- Created and maintained comprehensive documentation for system models, ensuring clarity and accessibility for stakeholders and providing a valuable reference throughout the development lifecycle.

CGI Inc, Bangalore, IN

2018-03 - 2020-05

Associate Software Engineer- System Analyst

- Developed detailed system designs using Object-Oriented Analysis and Design (OOAD) principles and Unified Modeling Language (UML) diagrams (e.g., class, sequence, and use case diagrams) to create structured, scalable solutions.

- Ensure system models are flexible and can adapt to evolving business requirements.
- Designed and managed complex data structures, creating logical and physical data models that support the system's functional requirements. Worked with database administrators and developers to ensure efficient data storage and retrieval.
- Analysed and identify inefficiencies in existing processes, proposing technical solutions that improve system performance and reduce operational costs.
- Supported the software development lifecycle by collaborating with developers, quality assurance teams, and project managers from project inception to deployment.
- Served as a liaison between business stakeholders and the technical development team, ensuring smooth communication and alignment throughout the project.
- Stayed up-to-date with industry trends, tools, and best practices in system analysis and software development to improve skills and contribute innovative ideas to projects.

Education

National University Of Ireland Galway

September 2020 - September 2021

Masters in Business Analytics

Graduated with 1.1 Honours (72% Aggregate).

Google Certifications

December 2017 - February 2018

Advanced Google Analytics Certification

Completed

Google Certifications

September 2017 - November 2017

Google Analytics Beginner Certification

Completed

SJB Institute Of Technology

August 2013 - August 2017

Bachelor of Engineering in Computer science and Engineering

Graduated with 1.1 Honours (73.4% Aggregate).

System Analysis and Technical skills

- Requirements Gathering & Analysis
- Data Modeling & Analysis
- Object-Oriented Analysis & Design (OOAD)
- Unified Modeling Language (UML)
- Problem-Solving & Critical Thinking.
- Process Improvement & Optimization
- Communication & Stakeholder Management
- Technical Documentation and Software Development Lifecycle (SDLC) Knowledge
- Project Management & Risk Assessment
- Programming Languages: JAVA, C# Windows Forms.
- Product Management Tools: ALM, Rally, Jira, Confluence, Aha
- Business Intelligence Tools: Tableau, IBM SPSS, SAP HANA. Power BI
- Databases: MySQL, MemSQL, Oracle and SAP HANA. Operating System: Windows, Linux.
- Cloud and message streaming Technologies: AWS. Azure Apache Kafka, Git(VCS).

Achievements

- Awarded with Pillar of the month award thrice while working with CGI
- Selected as Tech enthusiast for the Entrepreneurship club of the college
- Got selected for Indian 1st free educational institution "Jawahar Navodaya Vidyalaya" through High-school entrance exam. This is completely free education with accommodation for rural part of the people. For more details

Certifications

- Certified Scrum Product Owner (CSPO) by Scrum Alliance
