

# ADARSH RAJARAM HEGDE

Senior Product Manager

Dublin, Ireland | (+353) 089-451-6970 | [contactadarshr@gmail.com](mailto:contactadarshr@gmail.com) | [linkedin.com/in/contactadarshrajaram](https://www.linkedin.com/in/contactadarshrajaram)

## Professional Summary

Results-driven **Senior Product Manager** with a proven track record of leading full product development lifecycles—from initial discovery and strategy through delivery and post-launch optimization. Skilled in building innovative, customer-centric products from the ground up and driving them to market with measurable impact. Adept at defining clear product roadmaps, aligning cross-functional teams, and delivering outcomes that support both user needs and business growth.

Known for a structured yet agile approach to product ownership, combining deep user empathy with data-driven decision-making. Brings strong collaboration across engineering, design, and go-to-market teams to ensure timely delivery, high adoption, and continuous value generation.

## Work experience

### Mastercard Ireland, Dublin, IE

October 2021 - April 2024

#### Senior Product Manager

- Spearheaded the end-to-end product lifecycle for a loyalty points and rewards platform tailored to key card holders, enhancing customer engagement, retention, and value realization across both web and mobile channels.
- Translated customer insights, market research, and stakeholder feedback into a strategically aligned product roadmap that prioritized high-impact features and long-term business outcomes.
- Conducted regular discovery sessions with customers and cross-functional teams to deeply understand user pain points and validate solution approaches, ensuring product-market fit.
- Defined clear product requirements, MVP scope, success metrics, and risk profiles to deliver features that met compliance standards and exceeded customer expectations.
- Collaborated closely with legal and compliance teams to ensure full adherence to GDPR and other regulatory frameworks, embedding privacy-by-design principles throughout the development process.
- Led large-scale data migration initiatives, transitioning legacy reward systems to modern, scalable platforms while safeguarding data integrity, minimizing downtime, and ensuring a seamless user experience.
- Facilitated agile delivery practices including backlog refinement, sprint planning, QA coordination, and retrospectives, aligning cross-functional efforts to deliver on roadmap commitments.
- Used tools such as Jira, Confluence, and Gantt charts to manage dependencies, communicate timelines, and ensure transparency across stakeholders and leadership.
- Partnered with design, engineering, GTM, and customer success teams to develop and launch intuitive product experiences that improved usability and deepened customer loyalty.
- Continuously monitored product performance using analytics dashboards and customer feedback loops, owning the optimization of features to increase adoption, NPS, and overall customer satisfaction.
- Played a key role in scaling internal product practices, establishing frameworks and rituals that improved delivery speed, collaboration, and outcome tracking across product initiatives.

### CGI Inc. Bangalore, Karnataka

March 2018 - May 2020

#### Associate Product Owner

- Owned the product backlog for an internal reporting system, translating business intelligence requirements into actionable user stories that improved data visibility, compliance reporting, and decision-making efficiency.
- Collaborated with cross-functional teams to define reporting features that aligned with stakeholder KPIs, ensuring high adoption by end users across finance, operations, and leadership teams.
- Led the agile delivery of a CRM system implementation, partnering with sales, marketing, and customer success teams to define customer data workflows, automate engagement tracking, and improve lead conversion rates.

- Coordinated feature delivery through sprint planning, backlog refinement, and QA, ensuring the CRM product aligned with evolving go-to-market strategies and user feedback.
- Supported a cloud migration initiative, managing the transition of legacy on-prem systems to scalable, secure cloud infrastructure with minimal disruption to business operations.
- Defined and prioritized technical enablers and risk mitigation tasks to support a seamless cloud adoption experience, working closely with engineering, InfoSec, and DevOps teams.
- Conducted user interviews and worked with business analysts to identify pain points in legacy systems and inform new product features post-migration.
- Used tools like Jira, Azure DevOps, and Confluence to manage backlog items, track dependencies, and maintain transparency across technical and business stakeholders.
- Monitored adoption metrics, gathered feedback from internal users, and led iteration cycles to continuously enhance usability and system performance.
- Championed a user-centric approach, aligning product enhancements with operational efficiency and cross-departmental objectives.
