

ADARSH RAJARAM HEGDE

Technical Program and Product Manager

Dublin, IE | +353 89 451 6970 | contactadarshr@gmail.com | linkedin.com/in/contactadarshrajaram

Summary

Experienced Technical Program Manager with 6+ years of combined expertise in product and program management, delivering high-impact solutions across cloud-based, API-driven, and microservices architectures. Adept at leading cross-functional teams through the entire product lifecycle -- from discovery and scoping to technical delivery and post-launch optimization. Proven ability to manage complex technical programs, including API integrations, application deployments, and certificate/versioning controls, while ensuring alignment with product strategy and business goals. Strong track record in driving Agile delivery, stakeholder collaboration across global teams, and maintaining operational excellence. Successfully led PCI DSS certification and audit processes for 3 consecutive years, demonstrating a commitment to compliance, security, and quality. Known for bridging technical and business domains to deliver scalable, secure, and user-centric products.

Work experience

Mastercard Ireland

October 2021 - May 2025

Senior Technical PM

- Managed cross-functional fintech programs with budgets up to \$1.5M, delivering high-impact solutions across digital banking, payments, and fraud prevention platforms.
- Delivered 10+ product and compliance initiatives annually, reducing go-to-market timelines by 20% through Agile planning and stakeholder alignment.
- Collaborated with engineering and product teams to launch new payment gateway integrations, increasing transaction success rate by 15% across digital channels.
- Led Agile teams across 3 time zones, improving sprint velocity by 25% and enhancing delivery predictability for key regulatory and platform upgrades.
- Defined and maintained product backlogs, roadmaps, and schedules, ensuring 100% on-time delivery for critical features such as KYC enhancements and multi-factor authentication.
- Reduced onboarding time for SME clients by 30% through automation of account setup workflows and integration of third-party verification services.
- Conducted regular risk assessments and implemented mitigation strategies that decreased project delivery risks by 40% across multiple fintech platforms.
- Spearheaded process improvement efforts that improved stakeholder satisfaction scores by 18% (via post-project surveys) through clearer reporting and governance.
- Leveraged Jira, Confluence, and Power BI to manage 50+ user stories per sprint, track KPIs, and provide weekly status updates to senior leadership.
- Supported UAT and go-live activities across cloud-based platforms, ensuring defect resolution rates of 95%+ within the first week post-launch.

CGI Inc, Bangalore, IN

March 2018 - May 2020

Associate Product Owner

- Supported end-to-end delivery of 5+ digital banking and payment initiatives, collaborating with cross-functional teams to meet functional, regulatory, and business goals.
- Gathered and documented business requirements for features including transaction limits, KYC updates, and real-time fraud detection, reducing issue rework by 20%.
- Coordinated Agile ceremonies (stand-ups, sprint planning, demos) and maintained Jira boards, improving team delivery cadence and visibility.

- Assisted in creating process maps and BRDs for payment processing workflows and integrations with third-party APIs (e.g., identity verification, credit checks).
- Monitored project progress and flagged risks or blockers early, contributing to 90% on-time delivery of prioritized backlog items.
- Prepared weekly reports and dashboards for product managers and stakeholders, improving communication clarity and reducing decision delays by 25%.
- Participated in UAT planning and execution for mobile banking enhancements and compliance updates, achieving a 95% defect closure rate before go-live.
- Collaborated with QA, design, and tech teams to ensure alignment on scope and delivery timelines, contributing to a 15% increase in customer satisfaction (CSAT) scores post-launch.
- Used tools like Confluence, MS Excel, and Jira to document requirements, track tasks, and ensure traceability from requirements to release.
- Learned and applied Agile, Scrum, and SDLC methodologies in real-world projects, contributing to continuous improvement and team success.
