Work experience

Mastercard Ireland, Dublin, IE

October 2021 - present

Senior Product Manager - Technical

- Utilized SQL, Excel, and Power BI to conduct in-depth data analysis, providing insights that drove a 20% increase in process efficiency and informed executive decision-making. Created dashboards that tracked KPIs, streamlined reporting processes, and enabled real-time visibility into key business metrics.
- Led the requirements gathering process for over 3 high-impact projects, developing detailed business requirements documents (BRDs) and functional specifications. Effectively bridged gaps between stakeholders and technical teams, ensuring alignment with project goals and user needs.
- Spearheaded process improvement initiatives that reduced operational costs by up to 25% and decreased project turnaround times by over 30%. Applied agile methodologies to redesign workflows, automate repetitive tasks, and improve resource allocation.
- Built and maintained relationships with key stakeholders across departments, ensuring consistent communication and collaboration. Facilitated requirement workshops and feedback sessions, aligning project goals with organizational objectives and customer expectations.
- Managed multiple projects simultaneously, coordinating cross-functional teams through Agile and Waterfall methodologies. Achieved a 95% on-time delivery rate by ensuring scope clarity, conducting risk assessments, and maintaining regular progress tracking.
- Led a cross-functional team of designers, developers, and marketers, enhancing product development efficiency by 30%. Established and implemented A/B testing protocols, which boosted user retention rates by 25% within the first year. Optimized stakeholder communication processes, accelerating turnaround times for feature requests and bug resolutions.

CGI Inc. Bangalore, Karnataka

March 2018 - May 2020

Associate Software Engineer- Product Owner

- Documented and translated customer business functions and processes using Microsoft Visio and Lucid Charts to ensure system designs align precisely with client requirements.
- Enhanced team capabilities through technical training and coaching for professional and technical staff; developed a structured training program and conducted formal sessions on specific systems modules.
- Served as a shadow team lead on assigned projects, providing guidance to developers and coordinating with other project stakeholders.
- Designed and implemented interactive dashboards using Tableau, and presented user stories and scenarios to stakeholders to support project growth and funding opportunities.

- Conducted detailed reviews of project requirements, clearly defining actions needed to achieve project objectives. Collaborated closely with the development team and technical architects to design effective layouts and deliver accurate solutions to meet identified challenges.
