

ADARSH RAJARAM HEGDE

Senior Product Manager/ Product Owner

Dublin, Ireland | (+353) 089-451-6970 | contactadarshr@gmail.com | [linkedin.com/in/contactadarshrajaram](https://www.linkedin.com/in/contactadarshrajaram)

Professional Summary

Strategic and technically adept Senior Product Delivery Manager with 6+ years of experience delivering scalable, data-driven products in fintech, B2B SaaS, and enterprise environments. Proven track record of leading cross-functional Agile teams to define and execute product strategy, deliver customer-centric solutions, and drive business growth. Strong foundation in software development and cloud technologies, with hands-on expertise in API integrations, payments, and platform enhancements. Experienced in working across the full product lifecycle—from discovery and MVP delivery to market launch and iteration—while aligning with OKRs and stakeholder goals. Adept at translating complex customer needs into impactful product decisions in fast-paced, high-growth environments.

Work experience

Mastercard Ireland, Dublin, IE

October 2021 - May 2025

Senior Product Manager - Delivery

- Owned the end-to-end roadmap for data products supporting real-time transaction monitoring, fraud detection, and payments analytics.
- Defined product vision and delivered incremental value by managing cross-functional Agile teams using Scrum and SAFe frameworks.
- Led Agile ceremonies including backlog refinement, sprint planning, daily stand-ups, and retrospectives to align priorities and maximize team velocity.
- Collaborated with compliance, fraud risk, and product teams to define data requirements for KYC, AML, and transaction pattern analysis.
- Designed and prioritized user stories focused on data enrichment, transformation, and availability for key fintech services (e.g., card transactions, direct debits, instant payments).
- Leveraged Databricks (PySpark, Delta Lake) to process and analyze millions of daily transaction records for anomaly detection and trend forecasting.
- Applied data warehousing concepts (dimensional modeling, slowly changing dimensions, schema design) to enable consistent reporting and regulatory compliance.
- Partnered with data engineering to build secure, scalable ETL pipelines and feature stores supporting machine learning use cases in fraud and risk scoring.
- Defined data SLAs and quality metrics, ensuring high availability and accuracy for downstream reporting and operational systems.
- Created and launched interactive dashboards (Power BI/Tableau) to monitor KPIs such as transaction volume trends, payment success rates, fraud flags, and system latency metrics.
- Enabled business users with self-serve analytics by designing intuitive data visualizations and maintaining reusable dashboard templates.
- Led data product discovery workshops with business stakeholders and translated findings into actionable roadmaps and MVPs.

CGI Inc. Bangalore, Karnataka

March 2018 - May 2020

Associate Product Owner

- Owned the product backlog for an internal reporting system, translating business intelligence requirements into actionable user stories that improved data visibility, compliance reporting, and decision-making efficiency.
- Collaborated with cross-functional teams to define reporting features that aligned with stakeholder KPIs, ensuring high adoption by end users across finance, operations, and leadership teams.

- Collaborated with marketing, UX, and data teams to define KPIs for tracking user behavior, conversion funnels, and content performance.
- Created and prioritized backlog items related to event tracking, tagging plans, and data layer enhancements to support web analytics.
- Worked closely with developers and QA to implement, validate, and test tracking using Google Analytics (GA4) and Google Tag Manager (GTM).
- Configured custom events, goals, and reports in GA4 to provide insights on user journeys, page performance, and traffic sources.
- Participated in Agile ceremonies including stand-ups, backlog grooming, and sprint planning to ensure delivery of analytics capabilities.
- Developed GA4-based dashboards in Google Analytics and Looker Studio to provide actionable insights for marketing and product stakeholders.
- Supported A/B testing initiatives by defining event tracking and analyzing experiment performance within GA4.
- Maintained documentation for analytics tagging implementations and provided training to non-technical stakeholders on interpreting GA4 reports.
- Gathered feedback from stakeholders to iteratively improve analytics visibility and business decision-making.
