

ADARSH RAJARAM HEGDE

Senior Business Analyst- Immediate Starter

Dublin, IE | +353 89 451 6970 | contactadarshr@gmail.com | [linkedin.com/in/contactadarshrajaram](https://www.linkedin.com/in/contactadarshrajaram)

Summary

Results-driven Senior Business Analyst with 6 years of experience in the fintech domain, specializing in delivering regulatory-compliant, customer-centric technology solutions across payments, card services, and transaction monitoring platforms. Proven expertise in end-to-end business analysis, process modelling, system integration, and stakeholder engagement. Adept at bridging the gap between business needs and technical implementation through well-defined requirements and collaborative delivery practices. Experienced in both Agile and Waterfall environments, with a strong command of tools such as Jira, Confluence, Miro, and Microsoft Dynamics CRM. Committed to driving continuous improvement, ensuring alignment with enterprise architecture, and delivering high-quality outcomes that support strategic business goals.

Work experience

Creditsafe Ireland PVT Ltd.

August 2025 - October 2025

Senior Business Analyst- Contract

- Led the strategy, roadmap, and delivery of global fraud detection and monitoring products leveraging AI, ML, and LLM-based technologies.
- Collaborated with data science, engineering, and risk teams to design scalable AI models for real-time anomaly detection and transaction risk scoring.
- Oversaw end-to-end data integration, ensuring seamless ingestion, transformation, and analysis across multiple geographies and payment platforms.
- Translated complex AI and data insights into actionable business requirements and prioritized backlog items for engineering teams. Managed Agile delivery processes, including backlog refinement, sprint planning, and cross-team coordination to ensure timely product releases.
- Defined and monitored key fraud and performance KPIs, driving continuous optimization and proactive risk mitigation strategies. Worked closely with architecture and data platform teams to ensure model scalability, API performance, and robust data governance.

Mastercard Ireland, Dublin, IE

October 2021 - June 2025

Senior Business Analyst

- Led cross-functional requirements gathering sessions with stakeholders to define business needs, identify gaps, and translate them into detailed functional and non-functional specifications.
- Acted as the primary liaison between business units, development teams, and third-party vendors to ensure alignment of project goals with business objectives.
- Delivered end-to-end business process analysis and improvement recommendations, driving operational efficiency and digital transformation initiatives.
- Developed and maintained comprehensive documentation including BRDs, FRDs, user stories, process maps, and use cases to support agile and waterfall project methodologies.
- Collaborated with engineering teams on the design and implementation of Java-based RESTful APIs and microservices using Spring Boot, ensuring solutions were scalable, secure, and compliant.
- Led analysis of CRM system enhancements Microsoft Dynamics CRM including new feature design, small change requests, and resolution of production defects affecting transaction flows and user journeys.
- Created end-to-end business documentation, including process maps (BPMN), use cases, user stories, and data flow diagrams, ensuring completeness for development and QA teams.
- Wrote complex SQL queries and worked with stored procedures to extract, analyze, and validate data for business reporting, requirement verification, and decision-making support. Facilitated workshops, JAD sessions, and user interviews to gather insights and validate solution designs.
- Supported UAT planning and execution by developing test scenarios, coordinating user testing, and tracking defect resolutions.

- Ensured business processes and system solutions adhered to regulatory compliance standards, including PCI DSS, GDPR, and internal risk management policies.
- Business requirements were gathered and documented from stakeholders across IT and business units for enhancements and new workflows within ServiceNow.
- Functional specifications were created based on stakeholder inputs and translated into actionable user stories for the development team.
- Existing processes were analyzed, and inefficiencies were identified to recommend optimization opportunities using ServiceNow's capabilities (e.g., catalog items, approval workflows, SLA configurations). As-is and to-be process flows were mapped and documented to support alignment across cross-functional teams.
- User stories, acceptance criteria, and test cases were defined and maintained in Agile tools (e.g., JIRA or ServiceNow Agile module).

CGI Inc, Bangalore, IN

March 2018 - May 2020

Associate Software Engineer- Business Analyst

- Began career as a Java Backend Developer, working for 6 months on developing and maintaining backend services using Spring Boot and the Spring Framework, giving strong technical grounding in APIs, service orchestration, and application logic.
- Transitioned into a Business Analyst role, leveraging technical experience to bridge communication between development teams and business stakeholders effectively.
- Gathered and analyzed business requirements for financial services platforms including digital banking, payment processing, KYC, and account lifecycle management.
- Translated complex business requirements into detailed user stories, process flows, and functional specifications, ensuring traceability from concept to delivery.
- Collaborated with development teams on the implementation of Java-based REST APIs and microservices, ensuring functionality aligned with regulatory and business objectives.
- Utilized Postman for API validation and supported early-stage integration testing to confirm data flow and endpoint behavior.
- Wrote and executed SQL queries for data validation, transaction reporting, and troubleshooting issues in financial workflows.
- Maintained detailed documentation including BRDs, functional specs, and workflow diagrams across modules such as onboarding, fraud prevention, and transaction monitoring.

Education

National University Of Ireland Galway

September 2020 - September 2021

Mater of Science in Business Analytics.

Graduated with 1.1 Honours (73% Aggregate).

SJB Institute Of Technology, Bangalore India

August 2013 - August 2017

Bachelor of Engineering in Computer science and Engineering

Graduated with First class with distinction score of 73.4%(Aggregate)

Business Analytics and Technical Skills

Business Analysis Skills

1. Requirements Gathering & Documentation
2. Data Analysis & Visualization - SQL, Tableau, PowerBI
3. Process Mapping & Improvement
4. Stakeholder Management & Communication
5. Problem Solving & Critical Thinking
6. Project Management and Technical Knowledge
7. User Acceptance Testing (UAT) and Change Management

Programming Languages: JAVA, C# Windows Forms.

Business Intelligence Tools: Tableau, IBM SPSS, SAP HANA. Power BI

Databases: MySQL, MemSQL, Oracle and SAP HANA.Operating System: Windows, Linux.
