## Professional Summary

Strategic and technically proficient Product Manager and team leader with over 6 years of experience driving innovation across fintech, marketing, and retail technology sectors. Skilled in defining and executing data-driven product strategies that align business goals with scalable, customer-focused outcomes. Experienced in leading cross-functional teams through the full product lifecycle discovery, roadmap planning, delivery, and optimization while fostering collaboration, accountability, and agile excellence. I do have deep expertise in building AI-driven and API-first products across fintech, fraud, and data intelligence domains. I specialise in translating complex technical capabilities LLMs, multi-agent AI systems, cloud native architectures, and real-time decisioning into scalable customer-facing solutions. I lead product strategy, roadmap execution, and cross-functional delivery, ensuring measurable business impact through clear KPIs. My work has accelerated adoption, improved operational efficiency, and enabled intelligent automation across high-volume platforms. With strong technical depth and stakeholder alignment skills, I consistently drive products from concept to market while ensuring reliability, performance, and meaningful customer value.

## Work experience

---

**Creditsafe Ireland Pvt Ltd, Dublin**

**August 2025 - Present**

**Senior Product Manager- AI enrichment and Monitoring team (Contract)**

- Led the end-to-end product development of a multi-agent AI system powered by LLMs and LangChain, enabling Creditsafe customers to perform automated financial analysis, business reporting, credit checks, and real-time company news-based alerts.
- Increased customer efficiency by up to 60% by replacing manual credit research workflows with AI-generated financial summaries and automated decision support.
- Defined the product vision and roadmap for AI-first platform services, ensuring alignment with enterprise goals, security standards, and cloud architecture strategy.
- Translated complex capabilities including AI model orchestration, multi-agent workflows, memory systems, and cloud deployments (AWS) into clear user stories and development-ready requirements.
- Drove cross-functional collaboration with Engineering, ML, Data Science, DevOps, and Security, resolving requirement gaps and ensuring scalable, secure delivery of AI features.
- Improved delivery predictability by 30% by strengthening Agile processes, leading sprint planning, backlog refinement, and scope negotiation across distributed teams.
- Championed the evolution of intelligent platform features such as automated reasoning components, dynamic decision flows, and event-driven risk alerts, improving insight accuracy and reducing manual review effort.
- Authored detailed product documentation, API specs, and release notes, accelerating onboarding for internal teams and reducing support queries by 25%.
- Partnered with engineering leadership to design cloud-native microservices supporting real-time data ingestion, credit scoring workflows, and AI-driven analytics across global customer markets.
- Enabled delivery of real-time dashboards and alerting capabilities used by fraud, payments, and risk teams, improving response times to emerging risk signals by 40%.

---

**Mastercard Ireland, Dublin, IE**

**October 2021 - June 2025**

**Senior Product Manager - AI, Data Analytics and Engineering**

- Led the product Vision, strategy and roadmap for a real-time fraud detection platform powered by multi-agent LLM systems, reducing fraud investigation time by 45%.
- Delivered a suite of AI agents for event enrichment, customer profiling, fraud scoring, risk scoring, decision orchestration, and customer communication, increasing fraud-detection precision by 35%.

- Launched an LLM-based reasoning agent that improved detection of anomalous transaction behaviors, reducing false positives by 20%.
- Defined API-first workflows enabling real-time scoring and decisions within <200ms latency, supporting millions of daily transactions.
- Partnered with data science, engineering, and risk teams to refine models and scoring logic, increasing model lift by 15% and improving AUC performance.
- Implemented automated decision orchestration that increased case-handling efficiency by 30% across fraud operations.
- Enabled proactive customer communication via AI-driven messaging, reducing dispute calls by 18% and improving customer satisfaction scores.
- Led cross-functional delivery across ML, security, and platform teams, improving release velocity by 25% and ensuring regulatory compliance.
- Built dashboards and KPI monitoring frameworks to track fraud rates, model drift, and agent performance, improving operational response time by 40%.
- Delivered a scalable cloud-native architecture across AWS, increasing system resilience and achieving 99.95% availability.

CGI Inc. Bangalore, Karnataka

March 2018 - May 2020

Associate Product Owner

- Launched gamified loyalty features that increased customer activation by 55% within the first quarter.
- Improved monthly active users (MAU) by 38% through point-based rewards, challenges, and referral workflows.
- Reduced customer churn by 18% with personalized engagement journeys and behavioural triggers.
- Streamlined partner reward catalog integration, increasing reward redemption by 60%.
- Designed dashboards for customer retention KPIs, enabling marketing teams to optimize campaigns and improve ROI by 25%.
- Owned the roadmap for a real-time transaction analytics system enabling high-volume transaction streaming and historical analysis.
- Improved search and sort latency by 50%, enabling faster investigation and analytics workflows.
- Delivered advanced analytics (trend analysis, anomaly detection, batch reporting) that improved user insights and decision-making accuracy by 40%.

Education

National University Of Ireland Galway.

September 2020 - September 2021

Mater of Science in Business Analytics.

Graduated with 1.1 Honours (73% Aggregate).

SJB Institute Of Technology, Bangalore India.

August 2013 - August 2017

Bachelor of Engineering in Computer science and Engineering

Graduated with First class with distinction score of 73.4%(Aggregate)

Technical Skills

Programming Languages: JAVA, C# Windows Forms.

AI Tools: Lavable, n8n and Co-Pilot.

Product Management Tools: Aha, Rally, Jira, Confluence. Miro, Trello, Tableau, IBM SPSS, SAP HANA. Power BI

Databases: MySQL, MemSQL, Oracle and SAP HANA, Databricks.

Cloud Technologies: AWS.

UX designs: Figma, Lucid chart, Visio.
