

ADARSH RAJARAM HEGDE

Senior Product Manager

Dublin, Ireland | (+353) 089-451-6970 | contactadarshr@gmail.com | [linkedin.com/in/contactadarshrajaram](https://www.linkedin.com/in/contactadarshrajaram)

Professional Summary

Strategic and technically adept Senior Product Manager with 6+ years of experience delivering scalable, data-driven products in fintech, B2B SaaS, and enterprise environments. Proven track record of leading cross-functional Agile teams to define and execute product strategy, deliver customer-centric solutions, and drive business growth. Strong foundation in software development and cloud technologies, with hands-on expertise in API integrations, payments, and platform enhancements. Experienced in working across the full product lifecycle—from discovery and MVP delivery to market launch and iteration—while aligning with OKRs and stakeholder goals. Adept at translating complex customer needs into impactful product decisions in fast-paced, high-growth environments.

Work experience

Mastercard Ireland, Dublin, IE

October 2021 - May 2025

Senior Product manager

- Led the end-to-end product lifecycle for cloud-based payment and billing solutions, from ideation through launch, iteration, and market expansion — enabling seamless API and SDK integrations across a global client base.
- Collaborated closely with cross-functional stakeholders across engineering, architecture, compliance, QA, and support to define scalable and regulatory-compliant product requirements.
- Developed and owned the product roadmap, applying a lean MVP approach to prioritize high-impact features, validate assumptions, and deliver early value to users while managing technical feasibility and risk.
- Acted as the 'voice of the customer', conducting user research, synthesizing feedback, and championing pain points across internal strategy sessions and backlog grooming.
- Led Agile teams through sprint planning, backlog prioritization, and sprint reviews — improving team delivery velocity and transparency across multiple internal squads.
- Implemented OKRs and KPIs to track product success metrics, using data-driven insights to iterate on feature sets, improve performance, and optimize user experience.
- Supported go-to-market strategy and enablement, collaborating with sales, marketing, and client success teams to define positioning, messaging, and product launch plans.
- Represented the product in client-facing forums, including demos, onboarding sessions, and industry conferences — building product credibility and alignment with business development efforts.
- Key achievement: Drove a 22% increase in product adoption by optimizing user onboarding workflows and refining feature sets based on analytics and feedback loops.

CGI Inc. Bangalore, Karnataka

March 2018 - May 2020

Associate Product Owner

- Owned the product backlog for an internal reporting system, translating business intelligence requirements into actionable user stories that improved data visibility, compliance reporting, and decision-making efficiency.
- Collaborated with cross-functional teams to define reporting features that aligned with stakeholder KPIs, ensuring high adoption by end users across finance, operations, and leadership teams.
- Led the agile delivery of a CRM system implementation, partnering with sales, marketing, and customer success teams to define customer data workflows, automate engagement tracking, and improve lead conversion rates.
- Coordinated feature delivery through sprint planning, backlog refinement, and QA, ensuring the CRM product aligned with evolving go-to-market strategies and user feedback.
- Began as a Java developer, contributing to backend development and business logic for enterprise-grade applications before transitioning to a product-focused role.

- Worked closely with senior product managers and engineering leads to translate customer needs and business requirements into actionable user stories and product enhancements.
- Owned and prioritized the product backlog, ensuring that development teams worked on the most valuable and feasible features aligned with business goals.
- Facilitated Agile ceremonies including daily stand-ups, sprint planning, and retrospectives, fostering a collaborative, iterative delivery culture across technical teams.
- Validated product releases by collaborating with QA and cross-functional teams, conducting UAT, and ensuring alignment with acceptance criteria and quality benchmarks.
- Engaged stakeholders across departments to gather input, build alignment, and communicate product vision and delivery plans in a structured and persuasive manner.
- Implemented Agile best practices that improved delivery cadence, reduced delivery blockers, and enhanced transparency for cross-functional team members.
- Key achievement: Successfully transitioned from a technical to a product-facing role, maintaining strong credibility with engineering teams while introducing customer-centric delivery practices.
