

ADARSH RAJARAM HEGDE

Senior Product Manager

Dublin, Ireland | (+353) 089-451-6970 | contactadarshr@gmail.com | [linkedin.com/in/contactadarshrajaram](https://www.linkedin.com/in/contactadarshrajaram)

Professional Summary

Strategic and technically proficient Product Manager and team leader with over 6 years of experience driving innovation across fintech, marketing, and retail technology sectors. Skilled in defining and executing data-driven product strategies that align business goals with scalable, customer-focused outcomes. Experienced in leading cross-functional teams through the full product lifecycle—discovery, roadmap planning, delivery, and optimization—while fostering collaboration, accountability, and agile excellence. Adept at transforming complex requirements into actionable roadmaps that improve user engagement, retention, and business performance. Combines a strong technical foundation with strategic vision, leveraging APIs, LLMs, Databricks, and Snowflake to enable automation, analytics, and intelligent decision-making. Recognized for establishing sprint cadences, product review frameworks, and data-informed processes that enhance delivery predictability, quality, and scalability. Driven by clarity, curiosity, and execution excellence to build products where strategy, data, and technology converge to deliver lasting business impact.

Work experience

Creditsafe Ireland Pvt Ltd, Dublin

August 2025 - Present

Senior Product Manager-Global Fraud Detection AI and Monitoring

- Delivered the first version of a self-serve AI campaign builder, establishing a strong foundation for automated marketing workflows and scalable customer adoption.
- Improved activation and retention metrics by designing and implementing frictionless onboarding experiences, streamlining setup time, and enhancing early user engagement.
- Defined and executed a data-informed product roadmap, aligning feature development with strategic business objectives and measurable customer outcomes.
- Established a reliable sprint cadence and product review rhythm, ensuring consistent delivery, faster feedback loops, and stronger alignment between product, engineering, and business teams.
- Conducted quantitative and qualitative user research to identify core pain points, translate insights into actionable product improvements, and guide prioritization of roadmap initiatives.
- Partnered cross-functionally with engineering, design, and analytics teams to deliver high-quality releases, balancing short-term goals with long-term scalability.
- Introduced lightweight agile processes and resource management frameworks to improve team efficiency, predictability, and release velocity.
- Leveraged product analytics and experimentation to validate hypotheses, optimize feature performance, and enhance user retention through continuous iteration.
- Drove data-informed decisions across product and strategy discussions, using behavioral insights and performance metrics to guide innovation and business growth.
- Ensured product reliability and excellence by overseeing QA, validation, and model performance reviews, maintaining high standards across all releases.

Mastercard Ireland, Dublin, IE

October 2021 - June 2025

Senior Product Manager - Data Analytics and Engineering

- Led the end-to-end product lifecycle for data-centric enterprise applications, including strategy, roadmap development, and go-to-market planning for analytics and business intelligence products.
- Collaborated with cross-functional engineering teams to deliver scalable data models, real-time dashboards, and ML-enabled features, improving decision-making capabilities across key user segments.
- Owned the delivery of enhancements to mature AI and Fraud detection platforms, driving product growth through iterative feature releases and customer feedback loops.

- Directed the end-to-end development and enhancement of a data-driven fraud detection platform, defining product vision, strategy, and delivery roadmap in alignment with organizational goals.
- Collaborated with data engineering, architecture, and analytics teams to design and implement scalable data solutions, ensuring seamless onboarding and integration of new client data sources across multiple payment systems.
- Served as a key liaison between business stakeholders and technical teams, translating complex data and system requirements into actionable user stories and deliverables.
- Partnered with data scientists and AI engineers to curate high-quality datasets and enable advanced model training for predictive fraud detection and prevention.
- Leveraged modern data technologies including Databricks, Snowflake, message queues, and APIs to streamline data ingestion, processing, and analysis across the fraud ecosystem.
- Led Agile/Scrum ceremonies—managing backlog prioritization, sprint planning, and release cycles—to ensure high-quality and timely feature delivery.
- Mentored cross-functional teams, fostering a collaborative, data-driven culture that encouraged continuous improvement, transparency, and innovation.

CGI Inc. Bangalore, Karnataka

March 2018 - May 2020

Associate Product Manager

- Defined and executed the product vision and roadmap for data-driven products, ensuring alignment with business objectives and data strategy.
- Collaborated with data engineering, analytics, and architecture teams to design, build, and optimize data pipelines, warehouses, and analytical platforms.
- Translated complex business requirements into technical specifications, data models, and user stories for development teams.
- Owned the data lifecycle, including ingestion, transformation, storage, governance, and quality management.
- Partnered with stakeholders to identify and prioritize data initiatives, enabling actionable insights and supporting decision-making across the organization.
- Worked with data scientists and analysts to provision datasets for machine learning, predictive analytics, and reporting use cases.

Education

National University Of Ireland Galway.

September 2020 - September 2021

Mater of Science in Business Analytics.

Graduated with 1.1 Honours (73% Aggregate).

SJB Institute Of Technology, Bangalore India.

August 2013 - August 2017

Bachelor of Engineering in Computer science and Engineering

Graduated with First class with distinction score of 73.4%(Aggregate)

Technical Skills

Programming Languages: JAVA, C# Windows Forms.

Product Management Tools: Aha, Rally, Jira, Confluence. Miro, Trello

Business Intelligence Tools: Guidewire, Tableau, IBM SPSS, SAP HANA. Power BI
